

CHAPTER V

CONCLUSION AND SUGGESTION

5.1 Conclusion

Merdeka Belajar Kampus Merdeka (MBKM) is a program term by the government. Through this program, the participants are expected to help teachers prepare material, apply new methods of the learning process, and do other activities. Through this program, the writer is not only practicing hard skills but also practicing soft skills. Hard skills mean we come to campus and listen to the lecturer explain the material. Soft skills suggest we fall into the target school and practice teaching students there. To run the teaching process well, the writer should know each student's characteristics well. And that is not an easy matter. It would help if you had time to solve it.

The writer runs this program offline means the writer comes directly to school every day (work time). There are 37 students the writer handles during the program. All the students are from class X. However, sometimes, Ma'am Endah asks the writer to teach students from grade XI and XII. The program starts on August 9 and will end on December 10, 2022. There are twelve meetings for grade X, three for grade XI A, one for XI B, and one for grade XII.

While carrying out the teaching program, the writers encountered several challenges, such as the significant of learning support facilities, students with low English proficiency, covering students 'lack of understanding on the teacher's questions, and instruction, as well as their difficulty in writing English words.

However, this teaching assistance activity can run well. This can be seen from the student's enthusiasm for participating in the teaching and learning process and the student's scores. It should be noted that some students need to improve their ability to master certain materials.

5.2 Suggestion

With the end of the Field Work Practice activities and based on what the writer has described, the writer will provide suggestions for students so that in the future, they can learn English more deeply, especially in aspects of speaking in everyday life. The writer's advice regarding the research is that the participants should not stop learning and practicing their reading, writing, listening, and speaking English skills because those are the four basic skills that must be mastered in English. So, you don't stutter when you meet foreigners and when taking English exams such as TOEIC, TOEFL, and IELTS.
